

PUPPET RING

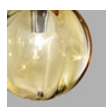

design Romani Sacconi Architetti Associati 2019

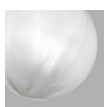

Modello SP 7A_CE

The Puppet Ring collection is based on the idea of creating a frame by combining rings with different diameters, on which crystal balls in three sizes are mounted. The new three suspension lamps of different sizes and shapes also maintain a light and elegant aesthetic by ethereally combining crystal glass, smoked, amber and shaded white with gold and satin black nickel finishes.
