

KIRA

design Alberto Saggia e Valerio Sommella 2017

Vistosi

Modello SP P_CE

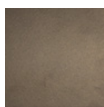

Kira is a collection of lamps combining metal with blown glass. The result is a set of lighting systems composed of two antithetical halves: a diffuser in crystal glass, decorated and embellished with a rich surface texture, topped with a turned metal cap, with a minimal and simple look. This collection combines contemporary forms to the preciousness and brightness of classical Venetian crystal chandeliers.
